

Health & Wellness Center

New Student Health Forms

Maine State law requires written documentation on all students' immunization history. Requirements are listed below and must be completed prior to coming to the college campus.

In order to provide quality medical care while you are on campus, we require knowledge of your previous medical history and a current (within the past one year) pre-entrance physical exam by your physician.

If you are chronically ill or take medication regularly, or if you are coming to Saint Joseph's with an unhealed injury or problem, please ask your physician to send a complete report, including a treatment plan.

If you are on regular medication, it is recommended that you bring that medication with you to school. If you need a refill on your medication, most medications can be refilled at a local pharmacy by the Health and Wellness Center provider.
